Company

Saryx Engineering Group (SEG)

/ Terminal Control Systems (TCS) Division at RBCT /HSEC Online® DevOps Team

/Saryx Engineering Group (SEG) Control and Automation Projects Division

info@saryx.com

Company Profile

Specialize in integration solutions for Industrial Control and Automation, ICT, Rail Monitoring, and Document Management and Compliance.

<u>Period</u>

November 2023 to date

Role

Full Stack Software Development and Data Science Solutions Architect

Report to

DataOps Manager – Andre Maakal
DevOps Manager – Lourence Gerber
Control and Automation Manager – Roland Vervey

Duties

Full Stack Software Development, Data Science Solutions Development

Current Projects

Improvements and Upgrades/Maintenance to the Current and Future Tech Stack of HSEConLINE® and SkillUp Training TMP.

Michael van Niekerk

Achievements

DRD GOLD 60MW SOLAR POWER PLANT DAILY REPORT

Full Stack Software Development and Data Science

- Designed, Developed, and Implemented:
 - Calculation Engine and SSRS Report that provides the necessary analytics and energy/cost calculations for the Daily Costing and Energy Generation Report for DRD Gold's 60MW Solar Power Plant in Gauteng, South Africa.
- The DRD Gold Daily Report includes Power Generation Data,
 Operational Data, Environmental Data, Grid Connection Data,
 Financial Data and KPIs.

RBCT TCS COMMUNICATIONS STATISTICAL ANALYSIS AND EARLY WARNING SYSTEM

Full Stack Software Development and Data Science

- Designed, Developed, and Implemented :
 - **Software Solution** that uses GIS and Geospatial data to provide a **Satellite Map** of the site with key locations and landmarks searchable on the map to aid Emergency Services with navigating the site.
 - **SSRS Report** that provides a **Site Map** with searchable landmarks and key locations that can be printed and provided to Emergency Services to aid them with navigating the site.
 - **SSRS Report** that provides a **Plant Overview SCADA System** for any given time over the past 90 days.
 - Software Solution that functions as an Early Warning System
 and Expert System providing real time comms evaluation using
 statistical modeling and data analysis of the client's
 communication systems to prevent unexpected plant-wide shut
 down due to communications failure.
 - Dashboard that provides real-time and historical analytics, offering graphical insights into the health of the Communications Systems.

Company

Bingelela Consulting Professionals (BCP)

/Specialist Procurement Division

www.bingelela.com

Company Profile

Project Management,

Quantity Surveyors,

Cost Accounting,

Contracting,

Mediation and Arbitration,

and Specialist Procurement Services.

Period

March 2022 – October 2023

Role

Consultant IT and Program Management

Report to

Project Manager

Divisional Manager

Duties

IT Consultant, Data Analyst, Systems Analyst, DB Analyst, Business Analyst, DevOps Consultant, IT Security Consultant, and IT support.

Manufacturing and System Process Flow and Optimization

Responsible for logistics and support when required.

Project Management assistance on the program, risk assessment, procurement, and site administration.

Achievements

Process/ Analysis

- Contributed to the determination of the Manufacturing Process.
- Created process and instrumentation diagrams (P&ID) for the pilot plant.
- Contributed to plant layout optimization.
- Implemented risk management strategies based on reliability principles to minimize failures.

Project and Risk Management

- Updated and maintained procurement plans.
- Compiled and maintained project programs.
- Compiled and maintained the risk register.
- Conducted site visits and provided support to contract managers and project managers.

ICT support

- Managed cloud storage and document systems.
- Provided software licensing and support (Office 365 Business).
- Diagnosed and resolved hardware issues.
- Sourced, reviewed, and recommended data information systems.
- Analyzed historical and current procurement data and created visual representations of over 50 suppliers.
- Assisted staff, consultants, and clients with IT-related queries.
- Ensured internet security.
- Proficient in programming languages: MS Visual Studio .Net Framework,
 Visual Basic, Java OOP, C#, C++, SQL, Python, VBA

Programming Languages Utilized:

- Backend: C#, VBA, Java OOP, Python, C++
- Data: SQL
- Frameworks: MS Visual Studio .NET

Contributed to the following projects:

BOTÉ INDUSTRIES - Hand-Built Rubber Pipe Manufacturing Plant: Duration:

Feb 2022 to Apr 2023

Scope:

- Conduct a market feasibility study.
- Design the Pilot Plant.
- Manage the construction and Commissioning of the Pilot Plant.
 Complete the Concept design and 70% cost estimate of the Main production plant (47000m²).
- Estimated project value: ±R200 million.

South32- Procurement Spend Optimization and Cost Savings:

Duration:

- Sep 2020 to Sep 2022

Scope:

- Analyzed procurement expenditure for 50+ suppliers, identified cost- saving opportunities, and conducted market testing.
- Review and improve material lists.

Create an electronic form for capturing vendor assessment information.

Company Café Schatzi Company Profile 40-seater Coffee Shop Period Dec 2019 to Feb 2022 Role Barista Assistant Manager Report to Owners

<u>Duties</u> Barista

Supervising,

5uper (151118)

Staff scheduling & training seasonal employees.

Operates a variety of specialized food service equipment,

Managed and is capable of teaching cash register operation (Point of Sale: GAAP)

Cashing up and cash control.

Responsible for cleaning and general maintenance of the facility and equipment.

Assume responsibility in the absence of the Café Owner.

Achievements

Growing with the start-up from a humble beginning, staying with the startup through the COVID-19 lockdown, and helping the startup to grow and thrive after surviving the forced shutdown of 2020.

- Barista [Dec 2019 Feb 2022)
 Operate and maintain manual Astoria 2 Group coffee machine.
 Grinding to cup
 - Serving over <u>40 000</u> cups of freshly made coffee to date with less than 1% return, and consistent quality.
- Assistant Manager [July 2020 Feb 2022]
- Customer interaction and problem solving

Database Design and Implementation

-BSc IT 2023

Facilitate the Analysis, Design, Build, and Implementation of a Database System that will allow the company to effectively process and store data of their operations.

Skills/Techniques Applied

- Create, Implement, and Modify new or existing Database Designs, manage possible problems, and extract necessary information from Databases using SQL.
- Have knowledge of, and insight into, the difference between file systems and databases, the relational
 database model, entity-relationship modeling, normalization of database models, database design, and
 SQL.

System Analysis and Design -BSc IT 2022

Analise, Design, and Implement of an Information System (Systems Development Life Cycle).

Skills/Techniques Applied

- Applied insight into the phases and techniques of the Systems Development Life Cycle.
 - Applied the tools and techniques to support system analysts and project managers during the planning, analysis, and design of an information system.
 - Apply the above knowledge and techniques to a computerized system's planning, analysis, and design.
 - Model ideas into visual representations to be translated into real-life systems.
 - Manage a software project and be able to apply creative skills when developing a computerized system and solving associated problems.
 - Work effectively on a team to develop a system.
 - Compile and present a project in writing, and treat customers professionally.
 - Apply computer resources ethically and responsibly when approaching a project.

Entrepreneurial Opportunities (Problem-Solving for

Managers)

-BSc IT 2022

Analise a Case Study provided and use the Creative Problem-Solving Process to come up with a viable Solution.

Skills/Techniques Applied

- Detailed knowledge and ability to examine the external environment for opportunities and threats and relate it to the internal environment.
- Identify and apply creative problem-solving as a managerial competency.
- Analytical and evaluative skills by providing effective solutions to heuristic problems in the application of creative problem-solving techniques.
- Effective solutions to problems within an ethical framework applicable to creative problem-solving.
- Display Individual and team-based presentation and communicative skills by using the appropriate information technology.

Information Security -BSc IT 2022

Identify, Analyze, and Evaluate the various Information Security Threats in the modern world and propose controls to counteract these threats.

Skills/Techniques Applied

- List, identify, and discuss the main information and cyber security concepts. These include concepts such as confidentiality, integrity, availability, authentication, privacy, secure software development, backup and recovery, and legal and ethical issues.
- Identify and describe security threats in the world we live in and recognize and propose appropriate controls to counteract these threats.
- Identify, discuss, and understand security threats and vulnerabilities in a computerized environment such as hardware errors, software failures, human errors, malicious intent, and natural causes.
- Act according to the code of conduct of the IT profession towards clients and use computer resources ethically and responsibly.

Communication Skills

Prepare a Software Requirements Document and User Manual Document for a Software Solution that will be designed and implemented in a Case Study.

-BSc IT 2022

Skills/Techniques Applied

- Analise and translate a user's description of a real-world problem into system requirements for a software solution.
- Have good/healthy interpersonal interaction with colleagues and work together.
- Have professional meetings so that all can contribute positively to the tender.
- Able to illustrate/demonstrate knowledge and carry it over to another individual or group of individuals.
- Stephen Covey 7 Habits of Highly Effective People
- David MacMurray Power Tools for Technical Writing
